

AStuff Spectra

Introduction

The AStuff Spectra is the world's first industrial-grade GPU computer supporting high-end graphics cards. It's designed to fuel emerging GPU-accelerated applications. This includes artificial intelligence, VR, autonomous driving and CUDA computing, by accommodating NVIDIA® GTX 1080 or TITAN X GPU. Leveraging Intel® C236 chipset, the AStuff Spectra supports Xeon® E3 v5 CPU with up to 32 GB ECC/non-ECC DDR4 memory. It incorporates general computer I/O like Gigabit Ethernet, USB 3.0 and serial ports. In addition to the x16 PCIe port for GPU installation, the AStuff Spectra further provides two x8 PCIe slots so you can have additional devices for information collection and communication, and supports two easy-access HDD/SDD drive bays.

The AStuff Spectra comes with sophisticated power design to handle heavy power consumption and power transient of a 250W GPU. Furthermore, to have reliable GPU performance for industrial environments, the AStuff Spectra comes with an enhanced heat sink for more efficient heat dissipation. This unique design guarantees the operation at 60°C with 100% GPU loading and make the AStuff Spectra extremely reliable for demanding field usage.
